

ANEES ABOOBACKER

Full Stack Developer — MERN

aneesaboo123@gmail.com | +91 75920 89970 | Malappuram, Kerala | linkedin.com/in/anees-aboobacker | github.com/ANESSABO0421 | Portfolio

PROFESSIONAL SUMMARY

Full Stack (MERN) Developer with 7 months of professional experience and 6 months of internship experience building production ERP, HRMS, and real-time platforms. Currently developing a multi-tenant HRMS serving 6 role-based dashboards across 2 institutional branches, where I own the Leave Management module and lead frontend/backend architecture refactoring. Skilled in MongoDB, Express.js, React.js, Node.js, React Native, REST API design, JWT authentication, RBAC, Socket.io, and PostgreSQL. Actively pursuing full-time Full Stack / MERN Developer roles.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, HTML5, CSS3, Framer Motion

Mobile: React Native, Expo

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC, Service Layer Architecture

Databases: MongoDB, Mongoose, PostgreSQL, Supabase

Real-Time & Jobs: Socket.io, WebSockets, node-cron, Event-Driven Architecture

AI & APIs: Claude API, OpenAI API, Stripe API, AWS S3, Cloudinary, PDFKit

DevOps & Tools: Git, GitHub, Vercel, Render, Netlify, Docker, Postman

Languages: JavaScript (ES6+), TypeScript

EXPERIENCE

XY-NEX Learning & Alans Academy, Kozhikode

Jul 2026 – Present

Full Stack Developer — React.js, Node.js, Express.js, MongoDB

- Own the Leave Management module of a multi-tenant HRMS serving 6 user roles across 2 institutional branches, implementing a multi-level approval workflow (Department Head to HR to Admin) with Node.js, Express.js, and MongoDB.
- Built a leave quota engine enforcing monthly and annual paid-leave caps with half-day splitting and week-off exclusion; resolved 15+ production defects across approval status, rejection handling, and quota calculation.
- Re-architected 6,000+ lines of monolithic React components into 50+ modular components, custom hooks, and Context providers, and split a 571-line Express controller into dedicated controller and service layers, cutting duplication and improving maintainability.
- Implemented real-time Socket.io notifications with room-scoped broadcasting and online/offline presence, plus node-cron scheduled jobs for event dispatch, reminders, and automated daily attendance closing.

SkiaFlow

Apr 2026 – Present

Founder & Full Stack Developer

- Founded a freelance software studio and delivered 2 end-to-end client products (Malappuram FC Ultras community platform, KrisCorp corporate website) using React.js, Next.js, Node.js, Express.js, and MongoDB.
- Architected REST APIs and JWT/RBAC authentication systems; owned requirements gathering, deployment on Vercel and Render, and post-launch maintenance.

Necttos OPC Private Limited, Pattambi

Nov 2025 – Apr 2026

Full Stack Developer — React.js, React Native, Node.js, MongoDB

- Built a Transfer Certificate generation module with Node.js and PDFKit, automating dynamic PDF creation and eliminating 100% of manual processing.
- Architected a React.js ERP frontend with reusable components, data-heavy tables, dashboards, and multi-step forms across 5+ feature modules, backed by an Alumni Management system using MongoDB aggregation pipelines.
- Designed RESTful APIs serving both React.js web and React Native mobile clients, and resolved a critical React Native form bug that allowed empty values to overwrite existing database records.

Softroniics, Perinthalmanna

May 2025 – Nov 2025

MERN Stack Developer Intern

- Developed full-stack features with React.js and Node.js/Express.js, owning end-to-end delivery from API design to UI integration.
- Implemented JWT authentication, RBAC, and modular middleware routing; optimized MongoDB queries via compound indexing and integrated Socket.io real-time broadcasting.

PROJECTS

Spendova — AI-Powered Expense Tracker (Mobile)

React Native, Expo, Node.js, Express.js, MongoDB, Gemini API

- Cross-platform income and expense tracker with voice-driven transaction entry via expo-speech-recognition, Gemini API spending insights, and category-wise analytics; Express/MongoDB API deployed on Render, mobile builds generated with Expo.

Malappuram FC Ultras — Football Community Platform

Next.js, Node.js, Express.js, MongoDB

- Admin-controlled standings, fixtures, galleries, and news management; added backend response caching to improve read performance.

KrisCorp — Construction Company Website

Next.js, Node.js, MongoDB, GSAP

- Client site with project showcases, inquiry management, and lead generation; SEO-optimized and deployed on Vercel with GSAP animations.

DevPulse — AI-Powered Code Review Platform

Next.js, Node.js, MongoDB, Claude API

- Integrates the Claude API for automated code quality analysis, structured review scores, RBAC, and review history; CI/CD on Render.

Synapse — NSS Management Portal

React.js, Node.js, MongoDB, Socket.io, Stripe API

- Multi-role portal with JWT authentication, real-time group chat, Stripe payments, and automated PDF certificate generation.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

2022 – 2025

GEMS Arts & Science College, Ramapuram — Calicut University, Kerala

CERTIFICATIONS & LANGUAGES

AI Hackathon Participant — Softroniics, Perinthalmanna (2025) | English (Fluent), Malayalam (Native), Hindi (Conversational)
